

Course Title	<b>LANDSCAPE DESIGN</b>				
Course Code	<b>ELDS</b>				
Course Type	Elective				
Level	Bachelor				
Year / Semester	5th, 6th, 7th or 8th semester				
Teacher's Name	Mariana Mourad				
ECTS	6	Lectures / week	2	Laboratories / week	
Course Purpose and Objectives	The course is an introduction to processes of making and forming natural and constructed landscapes. The students develop critical work on the status of landscape design practice.				
Learning Outcomes	The students are expected to approach different scales and tools of landscape design, focusing on handling green as a basic design element. They will be aware of technical and practical aspects of landscape in the context of sustainable design.				
Prerequisites	-	Required	-		
Course Content	The course focuses on the description and implementation of the principles and elements of landscape design.				
Teaching Methodology	The course contains introductory lectures and presentation of design projects techniques of landscape representation and design processes. A design studio on landscape design will help students to develop additional skills.
